## ORDINANCE NO. 16-08-160

**AN ORDINANCE ESTABLISHING THE COMPREHENSIVE SOLID WASTE MANAGEMENT IN THE MUNICIPALITY OF BULALACAO, ORIENTAL MINDORO**

**SPONSORS:** SB Member Edezer F. Acheron  
**CHAIRMAN:** Committee on Ordinances and Legal Matters

**SB Member Tulay M. Caring**  
Committee on Environment and Natural Resources

**SB Member Teresita S. Bantugan**  
Committee on Health and Sanitation

### ARTICLE I Title of Ordinance

This ordinance shall be known as the Comprehensive Solid Waste Management Ordinance of the Municipality of Bulalacao, Oriental Mindoro and providing penalties for violations thereof, and shall be referred to as the "Ordinance".

### ARTICLE II Coverage

This ordinance shall apply to all individuals but not limited to the following:

*(Handwritten signatures and initials)*

- a. Occupants of houses, apartments and other residence;
- b. Owners, managers and staff of commercial establishments such as hotels, restaurants/eateries, stores/shops (repair shops, mechanic servicing/car washing), entertainment and recreational centers, resorts, bakeries and all other related establishments;
- c. Owners, users, managers and staff of institutions like hospitals, clinics, funerals, parlors, schools, churches, banks, public and private offices and all other institutions of any kind;
- d. Owners, users, operators and employees of transportation facilities like airport, wharf, terminals, buses, jeepneys, taxis, tricycles, hauler trucks of livestock, commercial and industrial establishments, ships and boats, park, public open spaces, thoroughfares and all other facilities; and
- e. Owners, operators and work force of agricultural areas and construction sites and owners of vacant lots.

### ARTICLE III Authority and Purpose/Goals

**SECTION 1. Authority.** This ordinance is enacted to supplement the provisions of RA 9003, existing laws and ordinances related to Solid Waste Management (SWM).

**SEC. 2.** This ordinance is enacted for the following purposes:

**General:**

- a. To guide, control and regulate the generation at source, storage, collection, transportation, and disposal of solid waste within the locality of Bulalacao and promote an orderly and sanitary system for the same;
- b. To enhance the rehabilitation of the locality of Bulalacao through the necessary control and mitigation of negative environmental impacts attributed by the solid wastes.
- c. To promote and protect the health, safety, peace and convenience and general welfare of the inhabitants of Bulalacao.

**Specific:**

- a. To maximize generation of solid wastes and maximize possible resource recovery/recycling and utilization by:
  1. Maximizing the use and consumption of goods; allocating fair inputs in the production of goods, foods and services;
  2. Encouraging the salvaging of possible "recoverable" from solid waste for reuse and/or recycling back to production process;
  3. Encouraging the recycling and resource recovery of waste in own backyard through composting and biogas production; and

*(Handwritten signatures and initials)*

2021.05.25.15

4. Providing assistance and cooperation in the recycling of solid wastes.

**SEC. 3. Goal.** The primary goal of this Ordinance is to help enhance ecological balance of the community through sustainable and integrate waste management.

**SEC. 4. Objectives.** The objectives of this Ordinance are the following:

- a. To ensure round-the-clock cleanliness through orderly waste management;
- b. To cease and desist from utilization of open garbage dumps which serve as breeding places of disease-causing organisms, foul odors and harmful fumes; emit "greenhouse places" which contribute to global warming and thinning of the ozone layer, generate "leachate" which pollute soil and water resources.
- c. To maximize and optimize sanitary resource recovery for feeds, fuel, materials, energy, to the appointed personnel etc.,
- d. To minimize pollution arising from harmful gases, smoke, particulates produced by needless burning/dumping, polluted runoffs into water sources/ supply; and hazardous substances.
- e. To establish functional SWM organizational structure;
- f. To establish efficient and effective SWM support system and facilities;
- g. To increase awareness of the community on Integrated Solid waste Management (ISWM) through sustainable information, Education, and Communication and
- h. To promote the proper practice of ISWM by all stakeholders as a "way of life" and as a "shared responsibility".

#### **ARTICLE IV Definition of Terms**

**Section 1. Technical Terms.** The technical terms used in this Ordinance shall be defined as follows:

**Barangay Solid Waste Management Coordinator (Unit Coordinator)** – refers to the appointed personnel or selected barangay councilperson, which holds committee either on Health or on Environmental Protection.

**Biodegradable** - capable of being reduced into finer particles, degraded or decomposed by microbial organisms or enzymes (synonymous with compostable).

**Biogas digester** – are of two kinds: the "poso- negro" Taiwan type or the above- ground portable Valderia model. Biogas is a mixture of methane, carbon dioxide, and traces of inert gases produced by the fermentation of the animal manure organic waste or airtight digester chamber.

**Clinics** - a facility for diagnosis and treatment of usually walk-in or outpatient, includes among others, veterinarian's clinic, physician's clinic and other related services.

**Community Participation** – individual and sectoral involvement in the solid waste management program (e.g. implementation, monitoring, enforcement)

**Compost** – decayed organic material for use as soils conditioner or fertilizer.

**Composting** – biological degradation under controlled conditions; the process of making biodegradable such as food waste, animal waste, human waste, into compost by mixing them with soil, wastes biological additives/ activators (optional) and air without causing nuisance to public.

**Domestic waste** - refuse from households, as distinguishing from industrial waste, agricultural waste, hospital waste, etc. that may be classified as biodegradable (compostable) or non-biodegradable (non- compostable).

**Enzyme** - a protein produced by cells that contain substances to initiate or accelerate chemical reaction in plants and animal matter. It acts as an organic catalyst.

**Factory returnable** - non- biodegradable and non- compostable. Items and materials such as tin cans/metals, bottles/glass (including broken pieces), plastics Styrofoam, rubber, dry paper/dry cardboard, dry cloth/fibers, leather, etc., are classified factory returnable and separated in containers or place in on sack ( e.g. cans, bottles, containers already rinse and sold/ given away to collectors.)

**Feed materials** - all food waste, peelings, veggie trims, fish entrails, fowls innards, spoiled fruits, leftover, eggshells, rice/fish/meat washings, etc., that should be collected and kept in covered containers as hog/chicken/duck/pets/fish feeds.

**Fermentable** - fruit peelings, spoiled or over- ripe- fruits, juices, which may be fermented such as over- ripe guavas that may be used for juice, jam or wine.

**Fertilizer materials** - all compostable or biodegradable such as garden waste, (leave, twigs, weeds), animal waste (manure, carcasses), human waste (feces, urine blood, all excreta, solid wipes, pads, diapers ( remove plastic captions),etc., can be made into compost which is used as fertilizer in organic gardening.

**Filling materials** - the optimum use of waste. After applying the 3 R's of SWM, remaining materials may be compacted, mixed with rice chaff and "binder" for used in appropriate construction projects.

**Fine crafts** - handicraft, cottage industries, art works, toys and other livelihood projects ( such as paper Mache and basketry, tin crafts, metal crafts, plastic and rope macramé projects, feather crafts, wood crafts, "lahar" crafts) that utilize non- biodegradables.

Note: Styrofoam melted in small amounts of gasoline solvent provides cheap glue of "binder" for many of the projects.

**Food material** - snippets of leftovers of food such as certain kind of seeds, pulp, peelings that are made into pickles, "sweet"/candies, or snacks, etc., and other food products fit for human consumption.

**Functional facilities** - and equipment-useful equipment/ facilities devised or created from discards throwaways, junk scraps (e.g. chairs, table, doormats, play equipment from rubber tires, roofing from milk cans, flower pots, "planters" from plastic bags, sacks, and containers).

*(Handwritten signatures and initials)*

**Green charcoal** - another form of fuel or grass charcoal manufactured from compostable, organic cellulosic materials. With the use of enzymes, the lignin or binding material is broken down so that it can be molded, dried and used in charcoal-fed stoves.

**Hazardous and Toxic Waste** - special type of waste containing chemical, biological and radiological elements that are harmful to human health.

**Individuals** - this refer to all persons within the vicinity of municipality of Bulalacao. This term includes both residents and transients.

**Landfill leachate** - the downward seeping of water through the landfill carrying with it the dissolved water soluble contents of the waste that may be collected by an underground drainage system.

**Open Dumpsite** - any area or space, public or private, utilize as dumping ground of unsegregated waste.

**Purok Organization** - a community division with not less than 30 unit family member created, composed of six council person and one leader. The organized community is recognized as co- implementer of government programs and mandates of the law of the land.

**Putrescible** - a substances that decomposes at a certain temperature in contact with air and moisture, generally containing nitrogen.

**Receptacles/ dins** - containers or boxes used for waste storage such as cans, bags, sacks, empty drums and pails.

**Recycling** - process by which waste materials are transformed into new products in a such way the original products may lose their identity. The reuse, retrieval, re-commission of elements for any and all purposes necessary for healthful and productive living.

1. **Recycling of domestic waste.** The full utilization of domestic waste into factory returnable (around 21 %), feed ( about 1%), fuels, fine crafts, fermentable, etc. with little left filling materials. Thus includes man-devised and nature designed recycling schemes.

**Resource recovery**- the extraction of materials or energy from wastes.

**Restaurants/Eateries** - This category consists of establishments in the business of selling and serving foods such as: sidewalk stands, turo- turo's, carinderias, canteens, cafeterias, coffee shops restaurant/nightclubs, bars, beer gardens, lounges, and other establishments of this type.

**Segregation box** - refers to a receptacle made of local materials with at least 3 compartments for glass bottles, plastic bottles/ containers and tin cans/ aluminum cans.

**Solid waste** - discarded materials such as garbage, rubbish, trash, litter, junk, and refuse from any source with insufficient liquid to flow. This is the label used to refer to non-liquid wastes resulting from the domestic, commercial, agricultural, and industrial activities that can be divided into several components under two abroad categories.

**Bio-degradable-compostable-putrescible.** There are four (4) groups of waste under this category such as:

Handwritten notes and signatures at the bottom of the page, including the word "2016" and various scribbles.

- a. food (cooking/kitchen), waste: peeling, leftovers, vegetable trims,
- b. agricultural (garden) waste: leaves, flowers, twigs, branches,
- c. animal waste: manure, urine, carcasses, etc., and
- d. human waste: excreta, soiled pad, sanitary napkins, etc.

**Non- biodegradable/ non- compostable/ non- putrescible.** There are ten (10) groups of waste under this category

- a. metals: tin cans, aluminum, iron, lead, copper, and silver, etc
- b. glasses, bottles, cullet ( broken glass), sheets ( shards), minors, bulbs, etc.
- c. plastics: polyethylene (bags), polypropylene ( straw/jute, sack/ containers), polyurethane( foam, mattresses), polystyrene ( Styrofoam ), polyvinyl ( tubes, pipes, linoleum), ply acetate ( fibers, cloth, rayon), etc
- d. rubber natural and synthetic such as cloth, twine, etc.

**Solid Waste Management** - purposeful, systematic control of the generation, storage, collection, transport, separation, processing, recycling recovery and final disposal of solid waste.

**Solid Waste Management Information, Education and Communication Team** - refers to the appointed Barangay Solid Waste Management Coordinator organized as one under the deputized solid waste management officer of the solid waste management board of the municipality chaired by the local Chief Executive. Each coordinator is the executive officers of the Barangay Solid Waste Management Organization.

**Sorting at source** - segregation or separation of waste at the point of generation or at the very place where they are produced, into biodegradable or non- biodegradable.

**Stores/shop** - business establishment selling retail diversified goods, this category includes the following: sidewalks, sari-sari stores, stalls, groceries, public markets, department stores, malls, novelty shops, boutique, parlors, computer shops and the like.

**Zero waste resource management system** - ecological method of handling waste that does not degrade the environment nor pollute the air, water and soil, and facilities their sanitary retrieval, reuse or recycling.

## ARTICLE V Organization Component

**Section 1. The SWM Board.** In compliance with RA No. 9003, otherwise known as the Ecological Solid waste Management Act of 2000 a board shall be created composed of the following person to assume the following duties and responsibilities.

*(Handwritten signatures and initials)*

**COMPOSITION:**

- Chairperson - Municipal Mayor
- Members - Sangguniang Bayan Member  
- Chairperson, Committee on Health  
- Chairperson, Committee on Environmental Protection and Ecology  
- Sangguniang Kabataan Federation President  
- Association of Barangay Captains Federation President  
- Non- Government Organization Representative  
- Recycling Industry Representative  
- Manufacturing Industry Representative
- Secretariat - Mun. Environment & Natural Resources Office  
- Municipal Agriculture Office  
- Municipal Planning and Development Office

**DUTIES AND RESPONSIBILITIES:**

- a. Develop a Municipal Solid Waste Management Plan to ensure long terms Solid Waste management, as well as integrate the various solid waste management plans and strategies as the component barangays;
- b. Adopt measures to promote and ensure the viability and effective implementation of Solid Waste Management Programs in all component barangays;
- c. Adopt specific revenue-generating measures to promote the viability of the Solid waste Management Plan;
- d. Convene regular meetings for purposes of planning and coordinating the implementation of solid waste management plans of component barangays;
- e. Oversee the implementation of the Municipal Solid Waste Management Plan;
- f. Review every two (2) years or as need arises, the Municipal Solid Waste management plan for purposes of ensuring its sustainability, viability, effectiveness, and relevance in relation to local and international developments in the field of Solid waste Management;
- g. Develop specific measures and guidelines to implement the Municipal Solid Waste Management Plan;
- h. Recommend to appropriate local government authorities specific measures or proposal for franchise of build-operate transfer agreements duly recognize institutions to provide either exclusive or non-exclusive authority for the collection, transfer, storage, processing, recycling or disposal of the municipal solid waste;
- i. Provide the necessary logistical and operational support to component barangays

*(Handwritten signatures and initials)*

- j. Recommend measures and safeguard against pollution and preservation of the natural ecosystem;
- k. Coordinate the efforts of component barangays in the implementation of Municipal Solid Waste Management Plan; and
- l. Call on any concerned agency or sector, as it may deem necessary, for support or other appropriate action.

**SEC. 2. The SWM Division.** There shall be the technical implementing agency called the Solid waste Management Office to support the SWM board. It will have its own budget, facilities, personnel and resources to facilitate effective supervision, coordination, and monitoring of the integrated Solid waste management Program and guarantee a sustainable implementation. The SWM Division will tap existing local government lines agencies to implement some of the identified activities.

**SEC. 3. The Barangay SWM Body.** There shall be barangay Solid Waste Body to institutionalize the implementation of the program at barangay levels. Local Waste Managers/Barangay SWM coordinators shall be designated in every barangay by the Punong Barangay to oversee the collection of recyclable and shall be responsible in coordinating with accredited solid waste processor/dealer or manufacturers of recycled products.

**SEC. 4. The Information, Education, and Communication (IEC)Team.** There shall be a SWM-IEC Team to prepare programs, module, and materials to inform and educate individuals about fundamentals and practices of SWM in Municipality of Bulalacao. The team shall be composed of the following:

- Barangay Committee on Education and Information Campaign
- Barangay Committee on Engineering and MRT Construction
- Barangay Committee on Peace and Order and Barangay Committee on Infrastructure
- Barangay Committee on Economic Enterprise

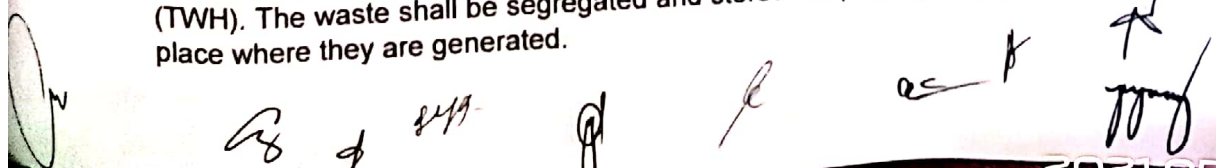

**SEC.5. The Barangay Information, Education and Communication (IEC) Team.** There shall be a Barangay SWM-IEC Team to disseminate information in barangays.

## ARTICLE VI Solid Waste Management Component

**Section 1. Waste Segregation and Storage.** There shall be segregation and storage of waste in the following manner:

**a. Residential Areas:**

1. Residents must segregate their generated solid wastes into four (4) groups:  
1) Group of factory returnable 2) kitchen waste, 3) residual or non-factory returnable or non-recyclable, (4) special waste (e. g due to unmanageable volume or quantity, types and effects in contact to human or animals.) Separate receptacles must be provided for Toxic and Hazardous Waste (TWH). The waste shall be segregated and stored temporarily at the site or place where they are generated.

2. The concerned residents shall ensure that the generated solid waste materials shall be properly separated in several receptacles according to its category or others and leftovers or biodegradable kitchen refuse shall be free from excessive moisture before storage.
3. Construct segregation box in front of their house at least with three compartments for glass bottles, plastic bottles/containers and tin cans, sacks, bags, binds, etc. They must also choose proper receptacle such as storage, collection, transport and disposal at less cost. Food must be placed in hard plastic container/pails or pit with proper ventilation and drainage of liquid.
4. The use of non-biodegradable disposal materials (e.g plastic-based, styro-based) must at all cost are minimized.
5. The use of biodegradable food liners, wrappers and containers must be maximized.
6. Recyclable biodegradable waste must be further sorted in separate bags that are properly labeled. This must be stored in a designated location inside the premise and will only be moved out during schedule of collection.
7. Waste intended for collection brought out in public in no scheduled time shall be considered littering and punishable by payment of a fine and rendering a community service to an LGU where such crime is committed.
8. Toxic Hazardous Waste (THW) must be collected and stored in a sealed polyethylene bags/containers prior to collection.
9. Public thoroughfares and grounds in front of or in the vicinity of residential house must be kept clean and tidy by the owner/lessee of the house or building at all times.
10. Trees, shrubs or other vegetation within the vicinity or residences must be regularly cared for and maintained to minimize generated wastes and unpleasant sight.

**b. Commercial Areas and Markets:**

1. The separate storage receptacles for segregated wastes in the commercial areas similar to (sec 1, par a.) must be individual and kept within the secured premise of the establishment prior to collection.
2. The use of biodegradable wrappers or bags (e.g. for dry goods/ products, paper base wrappers must be used) is practical and must be maximized.
3. The use of plastics, plastic-based and other non-biodegradable food receptacles (e.g. Styrofoam) must be maximized.
4. The lobby and fronting sidewalk/immediate grounds road gutter Commercial establishments must be maintained clean and presentable by the owner/operator/lessee of the establishments at all times.

*[Handwritten signatures and initials]*

5. The front sidewalk and immediate areas stall/open spaces markets must be kept clean and orderly by the lessee of said stall at all times.
6. All building construction for mass housing and commercial or business establishment covered by this ordinance shall incorporate in the plan and approval the provision for recyclable waste storage facility prior to its approval.

**c. Institutional/Industrial Areas:**

1. The head or the solid waste managing staff of any institution/industrial firm must ensure the proper and hygienic storage of generated and segregated solid wastes in a satellite storage facility within the controlled premises prior to collection schedule.
2. The head of any institution/ industrial firm must ensure the cleanliness and orderliness of its facilities, yards, and its fronting sidewalk, road gutter.
3. THW must be stored safely in durable and duly covered receptacle, which should be located in a secured and distant site prior to final collection/ disposal by the waste collection agencies.
4. Hospital, pharmaceutical, funeral wastes must be stored, collected, regulations of the Department of Health (DOH). Refer to the manual on Hospital Waste Management, PD856, known as the Sanitation Code of the Philippines.
5. The treatment and proper disposal of THWs must be taken care of by the concerned firm.
6. THW shall be collected in accordance with applicable laws, guidelines, rules and regulation of the Environmental Management Bureau (EMB-DENR) and the Philippine Nuclear Research Institute (PNRI). Refer to Republic Act 6969 otherwise known as the Toxic Substances and Hazardous and Nuclear Wastes Control act of 1990.

**d. Parks and Other Open Space Identified by the Board:**

1. Theft-proof receptacles for biodegradable and non- biodegradable wastes must be provided in strategic locations/ points by the city government.
2. The anti -littering law must be strictly enforced and observed.

**e. Transportation and Facilities:**

1. Human transportation facilities (terminal, buses, jeepneys, taxis, tricycles, ships and boats).

1.1 Separate receptacles for biodegradable and non-biodegradable must be provided within the terminal by the operators/ owners.

- 1.2 There must be at least two (2) waste receptacles with cover for biodegradable and non- biodegradable wastes inside a facility that is accessible to all passenger.
- 1.3 Contents of waste receptacles must be emptied and sorted at transport stations located along transport routes.

**f. Agricultural Area:**

1. Homogenous agricultural waste (rice, straws, corn combs, leaves and animal manure) shall be properly stockpiled/ stored by the concerned farmer.

**g. Littering:**

1. No person must litter or scatter solid wastes in the streets, highways, sidewalks, and other public areas (e.g, parks, playgrounds, rivers). Solid waste shall include among others but not limited to, the cigar/ cigarette butts, boxes/packages, candy/bread wrappers, matchsticks, disposable diapers, food packages, etc.

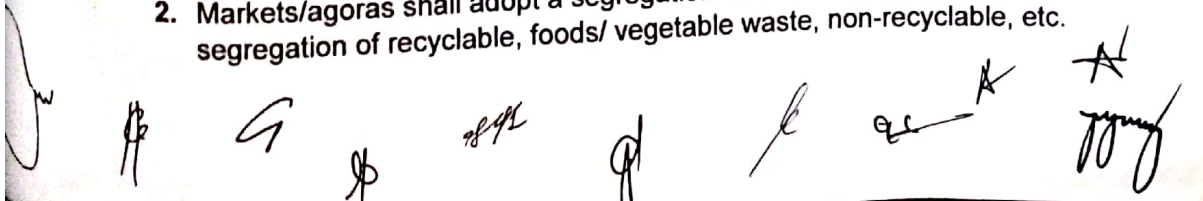

**SEC. 2. Waste processing and Resource Recovery.** There shall be segregation and storage of biodegradable kitchen waste in the following manner.

**a. Residential and Domestic Areas:**

1. Segregated biodegradable kitchen waste must be properly stored in a secured hard plastic container with over or compost pit. These biodegradable recyclable material must be processed for forty (40) days within the controlled premises of the households before proper utility or disposal of such materials.
2. Food and kitchen refuse must be collected as fodder or feeds for animals portions not suitable as fodder must be composted.
3. Reuse of recyclable non-biodegradable must be maximized. Sorted metal and plastic containers can be recycled as substitute pots for plants. Used tires can be used as playground material or stacked structure for backyard composting.
4. All other biodegradable-recyclables and THWs must be properly sorted and stored in appropriate receptacles prior to collection and transport.

**b. Commercial Areas and Markets:**

1. Segregation of wastes from small commercial establishments (stores, stalls, eateries), markets must be mandatory before issuance or renewal of business permits. Likewise, the same is required with medium and big commercial establishments (grocery stores, department stores, malls) plus a diagrammatic SWM scheme must be provided.
2. Markets/agoras shall adopt a segregation scheme that will facilitate the segregation of recyclable, foods/ vegetable waste, non-recyclable, etc.

3. Food waste from commercial center (cafeterias, turo-turo's, restaurants, and canteens) must be collected as fodder/ animal feeds and shall not be disposed of in sewers.

**c. Institutional/ Industrial Areas**

1. In industrial establishments, segregation of biodegradable/ compostable and non-biodegradable/ non-compostable waste shall be performed to avoid foul odor and proliferation of flies.
2. Schools, both private and public, and offices must adopt appropriate resource recovery and recycling strategies.

**d. Parks and Other Open Space Recognized by the Board:**

1. Discarded biodegradable and non- biodegradable must be collected and transported to the processing center.
2. Recyclable and factory returnable must be sorted further and brought to the material recovery facility or storage facility of the component LGU where such parks, open space and thoroughfares are located or directly go to the junk shops.

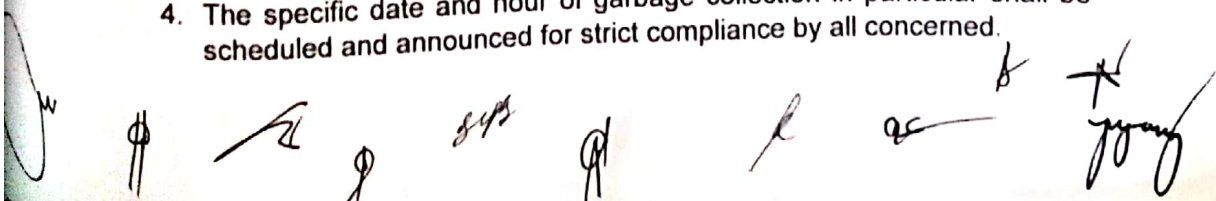

**e. Transportation and Facilities**

1. Recyclable and factory returnable from transfer stations along thoroughfares, port docks, must be brought back to the processing center or junk shops.
2. Disposal of THWs must be taken care of by the credited transport vehicle based on existing applicable laws.

**SEC. 3. Collection and Transportation.** There shall be a system of proper collection and transportation of solid waste in the following manner.

**a. Residential Areas:**

1. To promote greater community participation the concerned residents shall ensure that the segregated residual/ non-recyclable solid wastes are brought out in front of his gate/door and or along the collection route of the vehicle/ cart strictly during the designated collection time/period.
2. To promote greater community participation the concerned residents shall ensure bringing the segregated recyclable solid waste to the designated or established satellite Material Recovery Facility (MRF) for clustered or group of households or purok.
3. Point of collection should be along either the curbside or alleys for increased efficiency and productivity and reduced collection- related injuries.
4. The specific date and hour of garbage collection in particular shall be scheduled and announced for strict compliance by all concerned.

5. Garbage not segregated and/or placed in receptacles not approved by the local government must not be collected and shall be treated as "disposed of" and in violation of antilittering provision of this ordinance and must be penalized accordingly.
6. To promote segregation at source, residents are prohibited in transporting mixed solid waste in violation to sanitation operation or operating equipment related to the solid waste management without permit from the Municipal Environment and Natural Resources Office.
7. The residents shall report to the MENRO/ barangay or concerned official for any uncollected solid wastes within the vicinity of his /her residence if not it shall be treated as permitted by the residents in violation to antilittering provision of this ordinance and must be penalized accordingly.
8. The collection and transportation of any hazardous waste must be duly coordinated with the government agencies concerned with such type of waste.

**b. Commercial Areas and Market:**

1. The owner/operator/lessee of any enterprise must be responsible for the timely positioning of stored sorted/ segregated solid waste during collection period. This will be made known in advance by the proper authorities who will, when necessary, likewise assist individuals in using sanitary means to load wastes during collection.
2. Garbage not segregated and/or placed in receptacles not approved by the local government must not be collected and shall be treated as "disposed of" and in violation of antilittering provision of this ordinance and must be penalized accordingly.
3. In any case that the discarded solid wastes from the commercial establishments exceeds the maximum volume of waste to be collected as determined by the municipal government, the concerned establishment must be responsible for the transportation and disposal of its excess solid waste.
4. Requiring of permit to travel and dump in the final disposal facility of the municipality for excess **residual/non- recyclable** solid waste from commercial establishment shall be necessary for regulatory purposes by the Municipal Environment and Natural Resources Office.

**c. Institutional/Industrial Areas:**

1. The head or waste managing staff of any institutional / industrial establishment must see to it that the segregated community solid waste are moved out strictly during collection time/period at the designated collection points.

*[Handwritten signatures and initials]*

2. Transportation and disposal of industrial solid waste are regulated and shall be only permitted upon issuance of clearance by the Municipal Environment and Natural Resources Office-Solid Waste Management Division.
3. Toxic Hazardous Waste (THW) shall be transported in accordance with applicable laws, guidelines, rules and regulations of the Environmental Management Bureau (EMB/DENR) and the Philippine Nuclear Research Institute (PNRI). Refer to Republic Act 6969 otherwise known as the Toxic Substances and Hazardous and Nuclear Wastes Control Act 1990.

**d. Parks and Other Open Space Recognize by the Board:**

Collection and transportation of solid wastes from these stations will be done either by the Barangay Collection System (non-recyclable materials) or the Municipal Collection System (non-recyclable materials) and must be brought to the facility in the barangay and final disposal facility of the municipality.

**Section 4. Disposal of Solid Wastes.** There shall be a system of proper disposal of solid wastes in the following manner.

**a. Residential, Commercial Establishments, Institutions:**

1. Open burning or open dumping or burying of solid waste in flood prone area shall be strictly prohibited. Residual of solid waste after resource recovery, recycling and composting shall be disposed of in the municipal disposal facility, by sanitary land filling or other in an ecologically sound method.
2. Where space is available, all discarded biodegradable must be properly processed as compost for use as fertilizer for backyard gardens, orchards or ornamentals or disposed in an identified area as soil enhancer.
3. Hospital wastes, especially infectious wastes shall be treated in an ecologically sound and duly approved by DOH and DENR-EMB treatment method and facilities prior to disposal in a separate compartment in the sanitary landfill area.
4. All recyclable solid waste, factory returnable solid waste, and Toxic Hazardous Liquid Waste must be brought to the processing center for recycling.
5. Illegal dumping of solid waste along streets, alleys, river banks, and in any public places shall be strictly prohibited.

**b. Industrial Areas:**

1. THW shall be disposed of only after getting the proper assistance, clearance and guidance from Solid Waste Management Division Office.

*[Handwritten signatures and initials]*

2. THW shall be disposed or in accordance with the laws, rules and regulations, and guidelines, of the concerned national agencies like Environmental Management Bureau (EMB-DENR), DOH and the Philippine Nuclear Research Institute (PNRI). Refer to Republic Act and Nuclear Wastes Control Act of 1990.
3. Industries producing biodegradable wastes greater than 500kg daily shall include in their regular operation the process of waste decomposition.

**Section 5. Facilities and Equipment.** There shall be facilities to process solid wastes.

1. **Barangay Material Recovery Facility (BMRF).** This shall serve as the facility of the barangay for the storing, processing and trading recyclables from institutions and commercial establishments. This BPC can either be operated by barangay-based cooperative, private groups, NGOs, the barangay government itself or in a joint venture of two or all of these. It shall have a barangay collection system for the recyclables and THWs by establishing a network of registered handcraft/ pushcart operator mainly unemployed and displaced scavengers from the barangay.

The BPC shall have the following operation:

- a) Discarded materials (Residual/Non-recyclable) after final sorting shall be regularly collected and disposed of at the municipal disposal facility either by the Municipal Collection System or the Barangay Collection System.
  - b) The Barangay Collection System will be run by the barangay government. This is composed of collection transport vehicles (compactor, dump truck or any vehicle) and complement of 3 personnel (driver and 2 aides).
2. **Satellite Material Recovery Facility (SMRF).** This shall serve as the storage facility for non-biodegradable recyclable waste such as papers, plastics, bottles, metals and others before they are brought to the junkshops or manufacturing plants for recycling or processing.
  3. **Composting Center** for biodegradable waste coming from the government facilities or public markets. This shall serve as the facility to process biodegradable wastes into compost or fertilizer.
  4. **Sanitary Landfill.** This shall serve as the facility for solid waste disposal, which must initially meet requirements for an Environmental Compliance Certificate (ECC) of the DENR, and construction guidelines specified by RA 9003 that maintains, "No controlled dumpsites shall be allowed 5 years from the effective of the Act".
